

Experienced SAP BTP Technical Consultant with 7 years of expertise in cloud-native application development, SAP UI5/Fiori, and workflow automation. Skilled in SAP BTP Extension Suite, Cloud Foundry, and CAPM for delivering scalable side-by-side extensions and multi-tenant SaaS solutions. Proven track record in managing full project lifecycles including requirement gathering, architecture design, and migration of enterprise applications. Adept at automating business processes using SAP BTP Workflow and RPA, contributing to enhanced operational efficiency and successful project implementations.

## Experience

### SAP BTP Technical Consultant • Robert Bosch

Mar '18 – Sep '25

- Led development and deployment of multi-target applications on SAP BTP Cloud Foundry, integrating CAPM and SAP UI5 for enterprise solutions.
- Automated business workflows using SAP BTP Workflow and RPA, reducing manual intervention by XX% and accelerating process completion.
- Managed side-by-side extension projects for S/4HANA Public Cloud, ensuring seamless integration and performance optimization.
- Configured SAP BTP infrastructure including trust configurations, identity services (IAS & IPS), and destination management to support secure cloud operations.
- Collaborated with cross-functional teams using Agile methodologies and JIRA for project tracking and delivery.

### SAP Fiori and ABAP Developer • DB Systel

Jun '16 – Feb '18

- Developed SAP Fiori applications and OData services using SAP UI5 and ABAP on HANA to enhance user experience and system functionality.
- Performed debugging and development of RICEFW objects, contributing to three successful SAP implementation projects.
- Enhanced standard SAP applications by adding new features and columns, improving reporting and usability.
- Utilized GitLab for version control and continuous integration, ensuring code quality and traceability.

## Skills

**Cloud Platforms:** SAP BTP Extension Suite, Cloud Foundry, Neo Runtime, Multi-Target Application (MTA), SAP Build Apps, SAP Work Zone

**Programming & Development:** SAP UI5, Fiori, CAPM (Cloud Application Programming Model), Node.js, TypeScript, ABAP on HANA

**Automation & Workflow:** BTP Workflow Automation, SAP RPA, Build Process Automation, Low-Code/No-Code Development, Workflow Management

**Database & Integration:** HANA Cloud DB, OData Services, REST APIs, Stored Procedures, Cross-Container Access, Cross-Schema Access

**Tools & Methodologies:** JIRA, GitLab, Agile Development, Project Management, Test Scenario Documentation

**Security & Administration:** IAS & IPS Configuration, Trust Configuration, Destination Setup, Identity Service Management, Cloud Security

## Projects

### S/4HANA Public Cloud Side-by-Side Extension Development

Jan '19 – Jun '23

Virtue tech

- Developed custom extension applications using SAP BTP CAPM and SAP UI5 to enhance S/4HANA Public Cloud functionalities.
- Automated master data record creation through BTP Workflow and RPA bots, reducing manual processing time by approximately XX%.
- Implemented multi-target applications deployed on Cloud Foundry with seamless integration to HANA Cloud DB.

### BTP Workflow Automation and Build Apps Implementation

Jul '23 – Present

DB Systel

- Designed and deployed low-code/no-code applications using SAP Build Apps and BTP Workflow to streamline business processes.
- Configured trust and identity services (IAS & IPS) and managed destination setups for secure cloud connectivity.
- Utilized SAP RPA to automate repetitive tasks, improving process efficiency and accuracy.
